About Me

Full Stack Web Developer with 1+ year of experience, including internship and professional roles. Skilled in building scalable web applications using Java, Python, Spring Boot, JavaScript, Node.js, MongoDB, and SQL. Experienced in frontend development and workflow automation using Google Apps Script and n8n. Passionate about clean code and continuous learning.

WORK EXPERIENCE

RS Virla Group — *July 2025 - present*

Full Stack Developer

- Developed and deployed multiple production-level web applications and company profile websites using **HTML, CSS, JavaScript, Node.js, EJS, and MongoDB**.
- Integrated **AI-powered workflows using n8n** to automate processes and enhance user interaction.
- Built both **admin and user panels** with features like authentication, data management, search, and pagination.
- Independently handled **domain hosting and deployment** using GoDaddy.

Rishabh Software Pvt. Ltd — *nov 2024 – july2025*

Full Stack Developer

- Contributed to backend development using **Java and Spring Boot.**
- Worked on building and testing **RESTful APIs** and integrating with **MySQL** databases.
- Used **Postman and Git** for API testing, version control, and collaborative development.

TOPS Technologies — *Mar 2024 – Jun 2024*

Python-React Web Developer

- Backend development with Python & Django.
- Basic database handling and API implementation.
- Used **Postman and Git** for API testing, and **MYSQL** for Database.

KEY PROJECTS

Guest House Management System :

– **Tech:** Java, Spring Boot, React.js, MySQL

- Developed a full-stack web application with separate Admin and User panels.
- Implemented features like booking management, room and bed allocation, email notifications, and role-based access.

Friends Steel Group – Company Profile Website :

– **Tech:** EJS, JavaScript, Node.js, n8n

- Developed a dynamic company profile website using **server-side rendering with EJS**.
- Integrated backend logic using **Node.js** and automated processes using **n8n**.

AmicoMart.com – Company Profile Website : (Amicomart.com)

– **Tech:** EJS, CSS, Node.js, JavaScript

- Designed and developed a responsive multi-page company profile website from scratch.
- Implemented **AI-based automation using n8n** to enhance user engagement.
- Ensured cross-browser compatibility and optimized UI for better performance.

RS Virla Group – Company Profile Website : (https://rsvirla.com/)

– **Tech:** EJS, CSS, Node.js, JavaScript

- Designed and developed a corporate profile website with **dynamic content rendering**.
- Implemented clean UI and modular backend structure using **Node.js and EJS**.

Solar Portal – Internal Admin & User System : (https://solar-portal.vercel.app/)

– **Tech:** HTML, CSS, JavaScript, n8n, GoDaddy (Hosting)

- Built a complete **internal web portal** with separate admin and user panels.
- Implemented features like **unit management, dynamic forms, data listing, search, and pagination**.
- Enabled automated workflows using **n8n for data processing**.
- Deployed and hosted the application independently using **GoDaddy**.

CRE Frontend (RS Virla) : (https://rstmt.in/)

– **Tech:** EJS, JavaScript, CSS

- Built a dedicated **frontend interface for CRE operations**.
- Focused on user-friendly UI, responsive layout, and smooth user experience.

Insurance Pricing Forecast :

– **Tech:** HTML, CSS, JavaScript

- Built a dynamic tool to forecast insurance pricing using custom logic and UI interactions.

Responsive Web Design for E-Commerce Websites :

– **Tech:** HTML, CSS, JavaScript

- Netflix Preview (Single Page) – Created a responsive clone with modern layout, animations, and hover.
- Myntra Preview (Single Page) – Designed a product catalog preview using HTML, CSS.
- Focused on user-friendly UI, responsive layout, and smooth user experience.

Certifications

HackerRank - SQL | **HackerRank – JAVA** | **Python - NSDC**
